The Board Presentation of Code Review:

5. Utilizing C. Davis's clarification document, the Board of Elevator Regulations continued review of the proposed 524 CMR, Section 35 amendments to ASME A.17.1-2010. The goal of this Code Review was to more clearly understand what the Advisory Group's recommendations are and where in the 2010 Code, such proposed amendments apply. The board will discuss the technical merits of each recommended Massachusetts amendment at a later date.
6. The board made an informal agreement through the chairman to voice, rather than physically write all "objections" to the document (such as changing the numbering of codes and/or editing the text). This allowed the Board to initially review more code in a shorter time span.
7. The Board determined that Mr. Riley will review Ventilation and its impact on 780 CMR, in an effort to inform on the technical requirements of paragraphs in Section 2.1.4.
8. The paragraph entitled Section 2.7.3.4 will be moved below Section 2.7.2.3.
9. The Board identified spelling errors in Section 2.8.
10. The Board stated that in Section 2.14 that side emergency exits shall be prohibited.

Motion to adjourn made by John O'Donoghue, seconded by Michael Nicoloro, meeting ended at 3:45pm.
